Welcome to our new 2020 brochure.  
Inside is a selection of our extensive range of handles.

Our handles are jewellery for doors, some are deliberately decorative, some are packed with narrative, all are unique.

We have designed our products to be combined together in sizes and complementary pieces to form collections. They can be used across an interior scheme from entrance handles, to doors and right down to small drawer knobs.

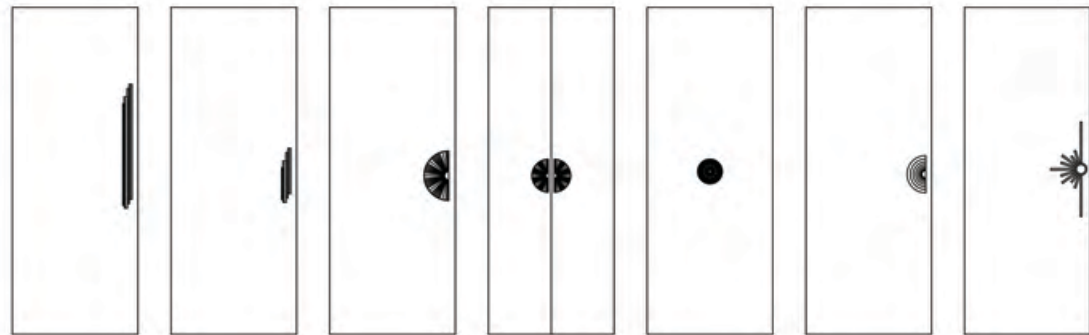

All are hand made in Nottingham, and because we have our own workshops we are constantly working on commissioned pieces of all sizes and shapes.

Philip Watts
