A EMPRESA JNF
THE JNF COMPANY / LA EMPRESA JNF

UMA EQUIPA DE CONFIANÇA COM HISTÓRIA

Desde 1965, a nossa principal atividade passa pela produção de ferragens para mobiliário e construção, com um percurso de contínua evolução e adaptação à economia e aos desafios do mercado, dedicando especial atenção ao desenvolvimento de soluções que vão ao encontro das tendências da arquitetura contemporânea.

Foram criados vários sectores dentro da JNF, nomeadamente a investigação e desenvolvimento de produtos que desempenham um papel fundamental na dinâmica da empresa. Temos também colaborações com organizações que nos fornecem informação e orientação no desenvolvimento de projetos, alguns deles ligados a universidades portuguesas nas áreas da engenharia e design.

O nosso departamento de Design é multidisciplinar e concilia elementos de diversas especialidades, como industrial, produto, gráfico, comunicação e marketing. Uma equipa dinâmica, que procura criar soluções inovadoras de forma clara e adequada, reafirmando sempre a identidade da empresa e o seu posicionamento no mercado.

As nossas instalações têm uma área coberta aproximada a 9000m², estando divididas em duas zonas principais: a produção e a logística. Empregamos diretamente cerca de 80 pessoas e indiretamente quase 150, através de subcontratação que utilizamos de forma cuidada, com um rigoroso controlo de qualidade, de acordo com a NP EN ISO 9001:2008.

Somos muito ativos na observação das tendências do mercado internacional, mesmo em áreas diferentes, tendo permanentemente em desenvolvimento uma quantidade considerável de novos projetos.

O nosso Programa de Sustentabilidade visa contribuir para a redução da pegada ecológica e desperdícios. Nesse sentido, para além da utilização do aço inox, também utilizamos acabamentos especiais não galvânicos e não poluentes, como é o caso do acabamento em titânio conseguido através da tecnologia PVD (Physical Vapor Deposition).

Como resultado desta procura constante por novos designs e processos, temos sido contemplados com o reconhecimento de empresa inovadora e sustentável.

O nosso compromisso com os clientes passa por garantir uma prestação de serviço e assistência de qualidade, fazendo tudo o que está ao nosso alcance para que fique 100% satisfeito.

A RELIABLE TEAM WITH A HISTORY

Since 1965, our main activity has been the production of hardware for furniture and construction, with a path of continuous evolution and adaptation to the economy and the challenges of the market, devoting special attention to the development of solutions that meet the trends of contemporary architecture.

Several sectors have been created within the JNF, namely research and development of products that play a fundamental role in the company's dynamics. We also have collaborations with organizations that provide us with information and guidance in the development of projects, some of them linked to Portuguese universities in the areas of engineering and design.

Our Design department is multidisciplinary and combines elements from different specialties, such as industrial, product, graphics, communication and marketing. A dynamic team that seeks to create innovative solutions in a clear and appropriate way, always reaffirming the company's identity and its positioning in the market.

Our facilities have a covered area of approximately 9000m², being divided into two main areas: production and logistics. We employ around 80 people directly and almost 150 indirectly, through subcontracting that we use carefully, with strict quality control, in accordance with NP EN ISO 9001: 2008.

We are very active in observing the trends of the international market, even in different areas, having a considerable number of new projects permanently under development.

Our Sustainability Program aims to contribute to reducing the ecological footprint and waste. In this sense, in addition to the use of stainless steel, we also use special non-galvanic and non-polluting finishes, such as the titanium finish achieved through PVD (Physical Vapor Deposition) technology.

As a result of this constant search for new designs and processes, we have been recognized with an innovative and sustainable company.

Our commitment to customers is to guarantee the provision of quality service and assistance, doing everything in our power to make you 100% satisfied.

UN EQUIPO CONFIABLE CON HISTORIA

Desde 1965 nuestra principal actividad ha sido la producción de ferretería para mobiliario y construcción, con un camino de continua evolución y adaptación a la economía y los retos del mercado, dedicando especial atención al desarrollo de soluciones que respondan a las tendencias de la arquitectura contemporánea.

Se han creado varios sectores dentro de JNF, a saber, investigación y desarrollo de productos que juegan un papel fundamental en la dinámica de la empresa. También tenemos colaboraciones con organizaciones que nos brindan información y orientación en el desarrollo de proyectos, algunos de ellos vinculados a universidades portuguesas en las áreas de ingeniería y diseño.

Nuestro departamento de Diseño es multidisciplinar y combina elementos de diferentes especialidades, como industrial, producto, gráfica, comunicación y marketing. Un equipo dinámico que busca crear soluciones innovadoras de forma clara y adecuada, reafirmando siempre la identidad de la empresa y su posicionamiento en el mercado

Nuestras instalaciones cuentan con una superficie cubierta de aproximadamente 9000m², estando divididas en dos áreas principales, producción y logística. Empleamos alrededor de 80 personas de forma directa y casi 150 de forma indirecta, mediante subcontratación que utilizamos con cuidado, con un estricto control de calidad, de acuerdo con NP EN ISO 9001: 2008.

Somos muy activos en la observación de las tendencias del mercado internacional, incluso en diferentes áreas, teniendo un número considerable de nuevos proyectos en permanente desarrollo.

Nuestro Programa de Sustentabilidad tiene como objetivo contribuir a la reducción de la huella ecológica y desperdicio. En este sentido, además del uso de acero inoxidable, también utilizamos acabados especiales no galvánicos y no contaminantes, como el acabado de titanio logrado mediante la tecnología PVD (Physical Vapor Deposition).

Fruto de esta búsqueda constante de nuevos diseños y procesos, hemos sido reconocidos con una empresa innovadora y sostenible.

Nuestro compromiso con los clientes es garantizar la prestación de un servicio y asistencia de calidad, haciendo todo lo que esté a nuestro alcance para que esté 100% satisfecho.

A EMPRESA JNF
THE JNF COMPANY / LA EMPRESA JNF

A NOSSA MISSÃO
Garantir a produção e distribuição de ferragens para construção e mobiliário que solucionam a maior parte das exigências dos projetos de arquitetura contemporânea e de reabilitação, com especial atenção à satisfação dos nossos clientes.

A NOSSA VISÃO
Ser uma referência nacional e internacional no setor onde exercemos atividade, apostando na tecnologia, inovação, funcionalidade e design, aliados à responsabilidade Ambiental e Social.

OS NOSSOS VALORES
Reconhecendo que a construção de uma identidade e cultura empresarial fortes são determinantes para a concretização dos desafios a que a JNF se propõe, mantemos os padrões de qualidade elevada nos nossos produtos e serviços de apoio ao cliente.

OUR MISSION
Ensure the production and distribution of construction and furniture hardware that solve most of the requirements of contemporary architecture and rehabilitation projects, with special attention to the satisfaction of our customers.

OUR VISION
To be a national and international reference in the sector where we operate, betting on technology, innovation, functionality and design, combined with Environmental and Social responsibility.

OUR VALUES
Recognizing that the construction of a strong corporate culture and identity are crucial for the realization of the challenges that JNF proposes, we maintain high quality standards in our products and customer support services.

NUESTRA MISIÓN
Asegurar la producción y distribución de herrajes de construcción y mobiliario que resuelvan la mayoría de los requerimientos de los proyectos de arquitectura y rehabilitación contemporánea, con especial atención a la satisfacción de nuestros clientes.

NUESTRA VISIÓN
Ser un referente nacional e internacional en el sector donde operamos, apostando por la tecnología, la innovación, la funcionalidad y el diseño, combinado con la responsabilidad ambiental y social.

NUESTROS VALORES
Reconociendo que la construcción de una sólida cultura e identidad corporativa es crucial para la realización de los desafíos que propone JNF, mantenemos altos estándares de calidad en nuestros productos y servicios de atención al cliente.

JNF EM HARMONIA COM A NATUREZA

Num planeta constantemente exposto a agressões ambientais, na JNF trabalha-se diariamente no sentido de diminuir a "pegada ecológica" dos nossos processos.

No desenvolvimento dos nossos produtos temos especial atenção para com os processos de fabrico, bem como tudo o que os envolve. O aço inox é reciclável e muita da nossa matéria-prima provém da reciclagem.

Os tratamentos de superfície são totalmente mecânicos ou utilizando tecnologias sem processos químicos. O acabamento de titânio é obtido por processos físicos.

As nossas preocupações surgem desde que idealizamos um produto até à forma como o embalamos, para que o ciclo de vida deste tenha o menor impacto ambiental possível. Temos como objectivo a eliminação do plástico de uso único nas nossas embalagens. Utilizaremos apenas materiais 100% recicláveis.

Hoje, mais do que nunca, para além de conhecer o produto final, é essencial ter em consideração os meios utilizados para o alcançar.

JNF IN HARMONY WITH NATURE

On a planet constantly exposed to environmental aggressions, JNF works daily to reduce the "ecological footprint" of our processes.

In the development of our products we pay special attention to the manufacturing processes, as well as everything that involves them. Stainless steel is recyclable and much of our raw material comes from recycling.

The surface treatments are entirely mechanical or using technologies without chemical processes. Titanium finish is achieved by physical processes.

Our concerns arise from the idea of a product to the way we pack it, so that its life cycle has the least possible environmental impact. We aim to eliminate single-use plastic in our packaging. We will only use 100% recyclable materials.

Today, more than ever, in addition to knowing the final product, it is essential to take into account the means used to achieve it.

JNF EN ARMONÍA CON LA NATURALEZA

En un planeta constantemente expuesto a agresiones medioambientales, en el JNF trabajamos a diario para reducir la "huella ecológica" de nuestros procesos.

En el desarrollo de nuestros productos prestamos especial atención a los procesos de fabricación, así como a todo lo que los envuelve. El acero inoxidable es reciclable y gran parte de nuestra materia prima procede del reciclaje.

Los tratamientos superficiales son totalmente mecánicos o utilizan tecnologías no químicas. Lo acabado de titanio se obtiene mediante procesos físicos.

Desde el momento en que diseñamos un producto hasta la forma en que lo envasamos, nos preocupa que el ciclo de vida del producto tenga el menor impacto medioambiental posible. Nuestro objetivo es eliminar el plástico de un solo uso de nuestros envases. Sólo utilizaremos materiales 100% reciclables.

Hoy, más que nunca, además de conocer el producto final, es imprescindible tener en cuenta los medios utilizados para conseguirlo.

GREEN SOLUTIONS

OS PRIMEIROS AÇOS INOXIDÁVEIS FORAM DESENVOLVIDOS PELA INDÚSTRIA SIDERÚRGICA ALEMÃ NO INÍCIO DO SÉCULO XX.

O TERMO GENÉRICO DE "AÇO INOX" ENVOLVE MUITOS TIPOS DE LIGAS DE AÇO COM ELEVADA RESISTÊNCIA À CORROSÃO, QUE SURGIRAM COMO RESPOSTA ÀS SOLICITAÇÕES DA INDÚSTRIA.

O aço inoxidável é reciclável e resulta ele mesmo em grande parte da reciclagem de sucatas. Uma das grandes vantagens da utilização de aços inoxidáveis, é não requerer tratamento superficial galvânico para lhe conferir o acabamento final.

Desta forma todos os processos industriais químicos, quase sempre poluentes, associados à galvanoplastia foram suprimidos, conseguindo-se acabamentos de muita qualidade em tudo idênticos ao cromado, no caso de aço polido, ou acabamentos mate, no caso de aço satinado ou areado ou acabamento industrial "RAW".

Existe ainda a possibilidade de realizar acabamentos especiais sobre o aço inoxidável, recorrendo a tecnologia PVD (Physical Vapor Deposition), obtendo-se produtos com maior dureza superficial e com cores diferentes do aço, como é o caso do dourado ou negro.

Normalmente o aço inox é "reparável" por processos mecânicos ou químicos, conseguindo-se recuperar o aspecto duma peça nova mesmo após muitos anos de uso.

Os aços inoxidáveis são uma liga metálica que contém, entre outros elementos, crómio, níquel e molibdénio os quais conferem grande resistência à corrosão. A resistência à corrosão deve-se sobretudo ao crómio.

Para um aço ser considerado inoxidável, deve conter no mínimo 10,5% de Crómio. A resistência à corrosão deve-se a uma película de óxido de crómio formada na superfície do aço que funciona como auto-protectora. O processo de formação desta "película" também é conhecido por passivação.

O níquel altera basicamente as características mecânicas do aço em termos de dureza com o objectivo de melhorar a sua mecanização.

THE FIRST STAINLESS STEELS HAVE BEEN DEVELOPED BY THE GERMAN INDUSTRY IN THE EARLY 20TH CENTURY.

THE GENERIC TERM "STAINLESS STEEL" INVOLVES MANY TYPES OF STEEL ALLOY WITH HIGH CORROSION RESISTANCE, WHICH EMERGED AS RESPONSE TO INDUSTRY REQUESTS.

Stainless steel is recyclable and itself results largely from recycled steel scrap. One of the great advantages of using stainless steel is that it does not require galvanic surface treatment to give the final finish to the product.

In this way all industrial chemical processes, almost pollutant, mainly by galvanic way have been removed. It's possible to reach high quality finishes identical to the chrome plated in the case of polished steel or matte finishes in the case of satin finish or sand finish or even industrial "RAW" finish.

It is also possible to carry out special finishes on stainless steel, using the PVD technology (Physical Vapor Deposition), obtaining products with a higher surface hardness and different steel color, as is the case of gold or black color satin.

Typically, stainless steel is "recoverable" by mechanical or chemical process. It's possible to recover the appearance of a new product after many years of use.

Stainless steel is an alloy that contains, among other elements, chromium, nickel and molybdenum, which confer high resistance to corrosion. The corrosion resistance is mainly due to the chromium.

To be considered a stainless steel, it must contains at least 10.5% chromium. The corrosion resistance is due to a Chromium oxide layer, formed on the steel surface which acts as self-protective. The formation process of this layer is also known as passivation.

Nickel essentially alters the mechanical characteristics of the steel in terms of hardness, in order to improve the machining process.

LOS PRIMEROS ACEROS INOXIDABLES HAN SIDO DESARROLLADOS EN ALEMANIA EN INICIO DEL SIGLO XX.

EL TÉRMINO GENÉRICO DE "ACERO INOXIDABLE" IMPLICA MUCHOS TIPOS DE ALEACIONES DE ACERO DE ALTA RESISTENCIA A LA CORROSIÓN, QUE SURGIÓ EN RESPUESTA A LAS PETICIONES DE LA INDUSTRIA.

El acero inoxidable es reciclable y resulta en gran medida a partir del reciclaje de chatarra de acero. Una de las grandes ventajas de la utilización de acero inoxidable es que no requiere tratamiento superficial de galvanizado para darle el acabado final.

De esta forma, se han eliminado todos los procesos industriales químicos, casi siempre contaminantes, asociados a la galvanoplastia, consiguiendo acabados de gran calidad, idénticos al cromado, en el caso del acero pulido, o mates, en el caso del satinado o acero arenado o industrial "RAW".

También es posible llevar a cabo acabados especiales en acero inoxidable, utilizando la tecnología de PVD (Physical Vapor Deposition), con obtención de productos con una dureza superficial superior y color diferente del acero como es el caso del oro o negro.

El acero inoxidable normalmente es "reparable" por processo mecánico o químico. Es posible recuperar la aparencia de una pieza nueva después de muchos años de uso.

El acero inoxidable es una aleación que contiene, entre otros elementos, cromo, níquel y molibdeno que confieren alta resistencia a la corrosión. La resistencia a la corrosión se debe principalmente al cromo.

Para ser considerado un acero inoxidable, debe contener al menos 10,5% de Cromo. La resistencia a la corrosión es debida a una película de óxido de cromo formada en la superficie de acero que actúa como auto-protección. El proceso de formación de esta "película" es también conocido como pasivación.

El níquel esencialmente altera las características mecánicas del acero en términos de duraleza con el fin de mejorar el mecanizado.

MATERIALES Y ACABADOS /

OS QUATRO PRINCIPAIS TIPOS DE AÇO INOX: AUSTENITICOS (CROMO-NIQUEL E CROMO-NIQUEL-MOLIBDÉNIO); FERRITICOS; DUPLEX; MARTENSITICOS

THE FOUR MAIN TYPES OF STAINLESS STEEL: AUSTENITIC (CHROMIUM-NICKEL & CHROME-NICKEL-MOLYBDENUM); FERRITIC; DUPLEX; MARTENSITIC.

LOS CUATRO TIPOS PRINCIPALES DE ACERO INOXIDABLE: AUSTENÍTICO (CROMO-NÍQUEL Y CROMO-NÍQUEL-MOLIBDENO); FERRÍTICO; DUPLEX; MARTENSÍTICO.

Os tipos de aço utilizados por JNF:

EN 1.4301 (AISI 304): Austenítico
É um dos aços inoxidáveis de uso mais generalizado na construção e indústria. Aço não magnético ainda que se possa converter em ligeiramente magnético no caso de ser maquinado. Possui uma excelente característica de dureza e resistência à corrosão. Teôr mínimo de crómio é de 18% e de níquel 8%.

EN 1.4401 (AISI 316): Austenítico
É ligeiramente mais resistente á corrosão comparativamente ao AISI 304. Aço não magnético ainda que se possa converter em ligeiramente magnético no caso de ser maquinado. Aconselhado para zonas de elevada salinidade, por exemplo em zonas costeiras ou em ambientes muito poluídos, ou em contacto com produtos químicos agressivos, ácidos e bases. Possui teôr mínimo de crómio 18% e níquel 10%, 2% de molibdénio.

EN 1.4372 (AISI 201): Austenítico
É um aço inoxidável com baixo teor de níquel, sendo por isso de elevada dureza. Resistência à corrosão é aceitável na maioria das aplicações , excepto nas zonas costeiras ou fortemente poluídas. Aço não magnético ainda que se possa converter em ligeiramente magnético no caso de ser maquinado. Possui teor mínimo de crómio 17%, níquel 3,6% , manganésio 7%.

EN 1.4016 (AISI 430): Ferritico
Aço inoxidável de uso geral na indústria alimentar. Utilizado normalmente em atmosferas não agressivas. Aço magnético, com aceitável resistência à corrosão. Acabamento superficial de elevada qualidade.

The steel grades used by JNF :

EN 1.4301 (AISI 304): Austenitic
It's one of the most widely used stainless steels in construction and industry. Non-magnetic steel which can be slightly magnetic converted if machined. It has an excellent hardness and corrosion resistance. Minimum contents of chromium is 18% and 8% nickel.

EN 1.4401 (AISI 316): Austenitic
It is slightly more resistant to corrosion, when compared with AISI 304. Non-magnetic steel which can be slightly magnetic converted if machined. Recommended for areas of high salinity, for example in coastal areas, very polluted places or in contact with agressive chemicals, as acids and bases. Has a minimum content of chromium 18% , niquel 10% and 2% molybdenum.

EN 1.4372 (AISI 201): Austenitic
Stainless steel with low nickel contents and is therefore a high hardness steel. Corrosion resistance is acceptable for almost applications, except in coastal areas or heavily polluted. Non-magnetic steel which can be slightly magnetic converted if machined. It has minimum content of 17% chromium, nickel 3,6%, 7% manganese.

EN 1.4016 (AISI 430): Ferritic
Stainless steel commonly used in food industry. Typically used in non-aggressive atmospheres. Magnetic steel with an acceptable corrosion resistance. High quality surface finish.

Los tipos de acero utilizados por JNF:

EN 1.4301 (AISI 304): Austenítico
Es uno de los aceros inoxidables más ampliamente utilizados en la construcción y la industria. Acero no magnético que puede convertirse en ligeramente magnético después de mecanizar. Tiene una excelente resistencia a la corrosión y duraleza. El contenido mínimo de cromo es de 18% y el 8% de níquel.

EN 1.4401 (AISI 316): Austenítico
Es ligeramente más resistentes a la corrosión en comparación con AISI 304. Acero no magnético que puede convertirse ligeramente magnético después de mecanizar. Indicado para zonas de alta salinidad, por ejemplo en las zonas costeras o en ambientes muy contaminados o en contacto con productos químicos fuertes, ácidos y bases. Tiene un contenido mínimo de cromo 18% , 10% níquel y 2% de molibdeno.

EN 1.4372 (AISI 201): Austenítico
Acero inoxidable de bajo contenido de níquel y por tanto es de gran duraleza. Resistencia a la corrosión es aceptable para la mayoría de las aplicaciones, excepto en las zonas costeras o muy contaminados. Acero no magnético que pueden convertirse ligeramente magnético después de mecanizar. Tiene contenido mínimo de 17% de cromo, níque l 3,6% y 7% de manganeso.

EN 1.4016 (AISI 430): ***Ferrítico***
Acero inoxidable comúnmente usado en la industria alimentaria. Se utiliza típicamente en ambientes no agresivos. Acero magnético con una resistencia a la corrosión aceptable. Acabado superficial de alta calidad.

SATINADO
ACABAMENTO MECÂNICO
Este é o nosso acabamento padrão disponível em todo o nosso hardware. A superfície é polida com material especial para obter um acabamento mate discreto com efeito escovado. É um acabamento muito discreto que confere aos nossos acessórios um ligeiro reflexo das cores envolventes.

ACABAMENTO ESPECIAL
PVD TITANIUM COATED
Este é um acabamento excecional de alta qualidade feito exclusivamente por tecnologia física. Podem ser obtidas diversas cores metálicas com elevada resistência à abrasão e à corrosão. Esta tecnologia não poluente é amplamente utilizada na indústria relojoeira. Algumas cores apresentadas na JNF: Titânio Natural, Dourado, Bronze, Cobre, Champanhe, Preto Profundo, Gun Metal, Chocolate Negro.

SATIN
MECHANICAL FINISH
This one is our standard finish available in all our hardware. The surface is polished with special brush material to achieve a discrete matte finish with a brushed effect. It's a very discrete finish that gives our fittings a faint reflect about the surrounding colors.

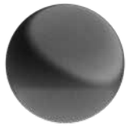

SPECIAL FINISH PVD COATED
This is one exceptional high quality finish made exclusively by physical technology. Several metallic colors can be achieved with high resistance to abrasion and corrosion. This non pollution technology is widely used in the watchmaking industry. Some colors performed at JNF: Natural Titanium, Gold, Bronze, Copper, Champagne, Deep Black, Gun Metal, Dark Chocolate.

SATIN
ACABADO MECANICO
Este es nuestro acabado estándar disponible en todos nuestros herrajes. La superficie está pulida con un material de cepillo especial para lograr un acabado mate discreto con un efecto cepillado. Es un acabado muy discreto que le da a nuestros herrajes un ligero reflejo de los colores circundantes.

ACABADO ESPECIAL TITANIO PVD
Este es un acabado excepcional de alta calidad hecho exclusivamente con tecnología física.
Se pueden lograr varios colores metálicos con alta resistencia a la abrasión y la corrosión.
Esta tecnología libre de contaminación se usa ampliamente en la industria relojera. Algunos colores realizados en JNF: titanio natural, dorado, bronce, cobre, champán, negro intenso, bronce metalizado, chocolate oscuro.

POLIDO
ACABAMENTO MECÂNICO
Este acabamento resulta do polimento do aço até à obtenção de superfícies completamente lisas e brilhantes. É um acabamento semelhante ao cromado brilhante. As peças reflectem de forma brilhante os tons envolventes. Algumas das nossas peças estão disponíveis neste acabamento. De uma forma geral, salvo algumas excepções, todas as peças podem ser fabricadas neste acabamento. Existem limitações quanto ao tamanho das peças que podem ser polidas.

MIRROR POLISHED
MECHANICAL FINISH
This finish results from the polishing of the steel until obtaining completely smooth and shiny surfaces. It's similar to a bright chrome finish. The pieces reflect shinning surrounding tones. Some of our pieces are available at this finish. Generally, with few exceptions, all fittings can be manufactured in this finishing. There are limitations on the size of parts that can be mirror polished.

BRILLO
ACABADO MECANICO
Este acabado resulta del pulimento del acero hasta la obtencion de superficies completamente lisas con brillo. Es un acabado similar al cromo brillo. Las piezas reflecten de forma brillante los tonos envolvientes. Algunas de nuestras piezas estan disponíbles en este acabado. De una forma general, salvo algunas excepciones, todas las piezas pueden ser fabricadas en este acabado. Hay limitaciones en el tamaño de las piezas que pueden ser pulidas.

MIRROR CHAMPAGNE
Aço inoxidável polido + pvd titanio champagne /
Mirror stainless steel + pvd titanium champagne /
Acero inox pulido + pvd titanio champán.

RAW
ACABAMENTO MECÂNICO
Este acabamento é obtido na fase final do processo de polimento. As peças são submetidas a um tratamento de abrasão. O resultado final são peças com uma textura muito agradável de ser tocada. Visualmente, as peças apresentam uma cor cinzenta betão, conferindo às peças um aspeto industrial, como se de ferramentas se tratassem. Todos os nossos produtos estão disponíveis com este acabamento, no entanto existe um limite de comprimento máximo de 600mm.

ACABAMENTO ESPECIAL
PVD TITANIUM COATED
Um acabamento muito mate e texturizado é obtido com este processo. A nossa gama de cores como o Ouro Envelhecido, o Preto Carvão, o Cobre Envelhecido e o Bronze Envelhecido podem dar um toque antigo à decoração.

RAW
MECHANICAL FINISH
This finish is achieved at the final phase of the polishing process. The parts are submitted to an abrasion treatment. The end result is absolutely dull pieces with a very nice texture to be touched. Visually, the pieces have a grey concrete like color, giving the pieces an industrial look, like if they were tools. All our products are available with this finish, however there is a limit on the maximum length of 600mm.

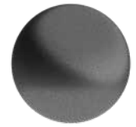

SPECIAL FINISH PVD COATED
A very matte and textured finish is achieved with this process. Our range of colors such as Aged Gold, Coal Black, Aged Copper and Aged Bronze can provide an antique touch to the decoration.

RAW
ACABADO MECANICO
Este acabado se consigue en la fase final del proceso de pulido. Las piezas se someten a un tratamiento de abrasión. El resultado final son piezas absolutamente mates con una textura muy agradable al tacto. Visualmente las piezas tienen un color gris cemento, lo que les da un aspecto industrial, como si fueran herramientas. Todos nuestros productos están disponibles con este acabado, sin embargo hay un límite de longitud máxima de 600mm.

ACABADO ESPECIAL TITANIO PVD
Con este proceso se consigue un acabado muy mate y texturizado. Nuestra gama de colores como Dorado envejecido, Negro carbón, Cobre envejecido y Bronce envejecido pueden aportar un toque antiguo a la decoración.

ACABAMENTO ESPECIAL EM ALUMÍNIO
SPECIAL FINISH ON ALUMINIUM / ACABADO ESPECIAL SOBRE ALUMINIO

ACABAMENTO ESPECIAL EM ALUMÍNIO
RAL COLORS

Em produtos de grandes dimensões e produzidos em alumínio não é possível adicionar acabamentos PVD, para obter cores diferentes a JNF utiliza a tecnologia de pintura electroestática.

A pintura electroestática é um tipo de revestimento aplicado com um pó seco de fluxo livre. Ao contrário da tinta líquida convencional, que é aplicada por meio de um solvente que evapora, o revestimento em pó é aplicado eletrostaticamente e depois curado com temperatura, garantindo a resistência mecânica ao risco, durabilidade e consistência de cor.

Para obter cores standarizadas,
é utilizado o sistema de gestão de cores RAL.

SPECIAL FINISH ON ALUMINIUM
RAL COLORS

It is not possible to add PVD finishes to large-sized products produced in aluminum. To obtain different colors, JNF uses electrostatic powder coating technology.

Powder coating is a type of coating applied with free-flowing dry powder. Unlike conventional liquid paint, which is applied using an evaporating solvent, powder coating is electrostatically applied and then cured under heat ensuring mechanical scratch resistance, durability and colour consistency.

In order to get standard colors we use RAL colour management system.

ACABADO ESPECIAL SOBRE ALUMINIO
RAL COLORS

No es posible añadir acabados PVD a productos de gran dimension producidos en aluminio, JNF utiliza tecnología de pintura electrostática para obtener diferentes colores.

La pintura electrostática es un tipo de recubrimiento que se aplica con un polvo seco de flujo libre. A diferencia de la pintura líquida convencional, que se aplica con un solvente que se evapora, el recubrimiento en polvo se aplica electrostáticamente y luego se cura con temperatura, lo que garantiza la resistencia mecánica, los rayones. la durabilidad y la consistencia del color.

Para obtener colores estandarizados
se utiliza el sistema de gestión de colores RAL.

MANUTENÇÃO E LIMPEZA DO AÇO INOXIDÁVEL
MAINTENANCE AND CLEANING OF STAINLESS STEEL
MANTENIMIENTO Y LIMPIEZA DE ACERO INOXIDABLE

MANUTENÇÃO E LIMPEZA DO AÇO INOXIDÁVEL

Os aços inoxidáveis, comparativamente a outros materiais, como o latão e o alumínio, apresentam uma resistência à corrosão e à abrasão substancialmente superior. Os principais agentes responsáveis pelo aparecimento de ferrugem são os seguintes:

- **Ausência de manutenção;**
- **Limpeza com agentes químicos inadequados, tais como ácidos ou bases fortes;**
- **Instalação em zonas costeiras de elevada salinidade no exterior, ou em áreas com forte concentração de cloro, como piscinas;**
- **Instalação em zonas fortemente poluídas, como zonas industriais;**

LIMPEZA DE ROTINA E CUIDADOS

Para conservar o aço inoxidável, limpar dedadas, gorduras e outras manchas, pode utilizar o nosso spray JNF (METAFLUX ou INOX PROTECT), aplicado com um pano macio e seco. Para remoção de manchas de óxido de ferro acidentais pode utilizar o nosso produto INOX REPAIR (JNF), aplicado conforme instruções do produto.

Nota: não utilizar produtos químicos não específicos para aços inoxidáveis, da sua utilização poderá resultar o aparecimento de manchas ou pontos de ferrugem. Exemplos: ácidos fortes ou bases fortes como HCl (ácido clorídrico); H2SO4 (ácido sulfúrico); HN03 (ácido nítrico); NaOH (hidróxido de sódio); KOH (hidróxido de potássio) e outros.

Para remoção de pequenos riscos em peças apenas com acabamento escovado pode ser utilizada uma malha abrasiva (JNF), passando no sentido da orientação do escovado.

Nota: não utilizar malhas abrasivas não específicas para aços inoxidáveis, lãs de limpeza ou escovas de arame. Além de poderem arranhar a superfície, estas malhas poderão deixar depósitos de ferro na superfície do aço inoxidável, o que poderá subsequentemente culminar no aparecimento de pontos de ferrugem.

MAINTENANCE AND CLEANING OF STAINLESS STEEL

The stainless steel compared to other materials such as brass and aluminum, present a resistance to corrosion and abrasion considerably superior. The main agents responsible for the appearance of rust are:

- *Lack of maintenance;*
- *Cleaning with inadequate chemicals, such as acids or bases:*
- *Installation in coastal areas of high salinity on the outside, or in areas with high concentration of chlorine, like swimming pools;*
- *Installation on heavily polluted areas such as industrial zones;*

ROUTINE CLEANING AND CARE

To preserve stainless steel, clean fingerprints, grease and other stains, you can use our JNF spray (METAFLUX or INOX PROTECT), applied with a soft, dry cloth. To remove accidental iron oxide stains, you can use our INOX REPAIR product (JNF), applied according to the product instructions.

Note: do not use no specific chemical products for stainless steel, of its use can result the appearance of spots or rust points. Examples: heavy acids or heavy alkaline products HCl (acid cloridric); H2SO4 (sulfuric acid); HN03 (acid nitric); NaOH (hydroxide of sodium); KOH (hydroxide of potassium) and others.

For removal of small scratches in the surface of the hardware with satin finishing only, you can use abrasive meshes (JNF), passing in the same direction of the orientation of the satin lines.

Note: do not use no specific abrasive meshes for stainless steel, wools of cleanness or wire brushes. Besides being able to scratch the surface, these meshes will be able to leave steel deposits in the surface of the stainless steel, that will turn in rust points.

MANTENIMIENTO Y LIMPIEZA DEL ACERO INOXIDABLE

El acero inoxidable en comparación con otros materiales tales como el laton o aluminio, presentan una resistencia a la corrosión y abrasión considerablemente superior. Los principales agentes responsables de la aparición de la oxidacion son los siguientes:

- *La falta de mantenimiento;*
- *La limpieza con productos químicos inadecuados, tales como ácidos o bases;*
- *La instalación en las zonas costeras de alta salinidad en el exterior, o en áreas con alta concentración de cloruro, como en piscinas;*
- *La instalación en zonas muy contaminadas como zonas industriales;*

LIMPIEZA DE RUTINA Y CUIDADOS

Para conservar el acero inoxidable, limpiar huellas dactilares, grasa y otras manchas, puede utilizar nuestro spray JNF (METAFLUX o INOX PROTECT), aplicado con un paño suave y seco. Para el retiro de manchas acidentales de oxido de hierro puede utilizar un producto del tipo INOX REPAIR (JNF), aplicada segun los manuales de instrucciones.

Nota: no utilizar productos químicos no específcos para el acero inoxidable, de su uso podrá resultar la formacion de puntos de oxido. Ejemplo: acidos o alcalinos fuertes como: HCl (ácido cloridrico); H2SO4 (ácido sulfúrico); HN03 (ácido nítrico); NaOH (hidróxidodel sodio); KOH (hidróxido de potasio) y otros.

Para la eliminación de pequeños rayados en la superficie de las piezas, solo con acabado satinado, se pueden utilizar mallas abrasivas (JNF), que pasan en la misma dirección de la orientación de las líneas de satin.

Nota: no utilice ningúna malla abrasiva non específica para el acero inoxidable, las lanas de limpieza o los cepillos de alambre. Además de poder dañar la superfcie, estos acoplamientos podrán dejar depósitos de hierro en la superfcie del acero inoxidable, el cuál podrá convertirse en puntos de oxido.

INOX PROTECT:
Spray para protecção e reparação de superfícies em aço inox. Inox protect é um produto líquido não aquoso, de baixa viscosidade, com cor avermelhada e odor característico. É um produto formulado para a protecção, manutenção e abrilhantamento de aço inox. Não utilizar em aço inoxidável com acabamento PVD TITANIUM, ouro (24K/18K), prata, bronze, cobre, latão, madeira, pele, alumínio, acabamentos lacados e anodizados.

INOX PROTECT:
Spray for stainless steel surfaces protection and repair. Inox protect is a non-aqueous liquid product of low viscosity with reddish color and characteristic odor. It is a formulated product for the protection, maintenance and stainless steel polishing. Do not use in stainless steel with PVD TITANIUM, 24K / 18K gold, silver, bronze, copper, brass, wood, leather, aluminum, lacquered and anodized finishes.

INOX PROTECT:
Spray para protección y reparación de superficies de acero inox. Inox protect es un producto líquido no acuoso de baja viscosidad con color rojizo y olor característico. Es un producto formulado para la protección, mantenimiento y pulido de acero inoxidable. No utilizar en acero inoxidable con acabado PVD TITANIUM, oro (24K/18K), plata, bronce, cobre, latón, madera, piel, aluminio, acabados lacados y anodizados.

INOX REPAIR:
Spray para limpeza e reparação de superfícies em aço inox. Inox repair é um produto líquido concentrado, ácido, de média viscosidade, solúvel em água em todas as proporções praticamente incolor e inodoro. Contém ácido fosfórico, agentes tensioactivos e inibidores de corrosão. PH<1. Não utilizar em aço inoxidável com acabamento PVD TITANIUM, ouro (24K/18K), prata, bronze, cobre, latão, madeira, pele, alumínio, acabamentos lacados e anodizados.

INOX REPAIR:
Spray for cleaning and repairing surfaces in stainless steel. Inox repair is a concentrated liquid product, acidic, medium viscosivity, water soluble in all proportions, almost colorless and odorless. Contains phosphoric acid, surfactants and corrosion inhibitors. PH<1. Do not use in stainless steel with PVD TITANIUM, 24K/18K gold, silver, bronze, copper, brass, wood, leather, aluminum, lacquered and anodized finishes.

INOX REPAIR:
Spray Inox repair es un producto líquido concentrado, ácido, de viscosidad media, soluble en agua en todas las proporciones, casi incolor e inodoro. Contiene ácido fosfórico, agentes tensioactivos e inhibidores de corrosión. PH<1. No utilizar en acero inoxidable con acabado PVD TITANIUM, oro (24K/18K), plata, bronce, cobre, latón, madera, piel, aluminio, acabados lacados y anodizados.

MANUTENÇÃO E LIMPEZA DO AÇO INOXIDÁVEL COM ACABAMENTO PVD TITANIUM

Este acabamento é conseguido pela tecnologia PVD (Physical Vapor Deposition). É um processo não galvânico, não poluente, amplamente utilizado na indústria da relojoaria. O aço é polido ou satinado, conseguindo-se peças em titânio brilhante ou satinado. Trata-se dum acabamento de excepcional qualidade, conferindo ao produto final uma dureza adicional e uma resistência à corrosão elevadíssima. Embora bastante mais resistente à corrosão que o aço inoxidável sem PVD existem agentes responsáveis pelo aparecimento de descoloração:

- **Ausência de manutenção**
- **Limpeza com agentes químicos inadequados, tais como ácidos ou bases fortes**
- **Instalação em zonas costeiras de elevada salinidade no exterior, ou em áreas com forte concentração de cloro, como piscinas**
- **Instalação em zonas fortemente poluídas, como zonas industriais**

LIMPEZA DE ROTINA E CUIDADOS

Para conservar o aço inoxidável, limpar dedadas, gorduras e outras manchas, pode utilizar o nosso spray JNF (METAFLUX ou INOX PROTECT), aplicado com um pano macio e seco.

Nota: não utilizar outros produtos químicos, da sua utilização poderá resultar o aparecimento de manchas ou pontos de ferrugem. Exemplos: ácidos fortes ou bases fortes como HCl (ácido clorídrico); H2SO4 (ácido sulfúrico); HN03 (ácido nítrico); NaOH (hidróxido de sódio); KOH (hidróxido de potássio) e outros.

Nota: não utilizar malhas abrasivas, lãs de limpeza ou escovas de arame. Além de poderem arranhar a superfície, estas malhas poderão deixar depósitos de ferro na superfície do aço inoxidável, o que poderá subsequentemente culminar no aparecimento de pontos de ferrugem.

MAINTENANCE AND CLEANING OF STAINLESS STEEL WITH TITANIUM PVD COATING

This finish is achieved by PVD technology (Physical Vapor Deposition). It is a non galvanic, pollution free process, widely used in the watch making industry. The steel is polished or satined, obtaining glossy or satin titanium parts. This is an exceptionally high quality finish, giving the final product an additional hardness and a very high discoloration appearance. Although considerably more resistant to corrosion than stainless steel without PVD there are agents responsible for the appearance of rust:

- *Lack of maintenance*
- *Cleaning with inadequate chemicals, such as acids or bases*
- *Installation in coastal areas of high salinity on the outside, or in areas with high concentration of chlorine, like swimming pools.*
- *Installation on heavily polluted areas such as industrial zones.*

ROUTINE CLEANING AND CARE

To preserve stainless steel, clean fingerprints, grease and other stains, you can use our JNF spray (METAFLUX or INOX PROTECT), applied with a soft, dry cloth.

Note: do not use other chemical products, its use will result in the appearance of spots or rust points. Examples: heavy acids or heavy alkaline products HCl (acid cloridric); H2SO4 (sulfuric acid); HN03 (acid nitric); NaOH (hydroxide of sodium); KOH (hydroxide of potassium) and others.

Note: do not use abrasive meshes for stainless steel, wools of cleanness or wire brushes. Besides being able to scratch the surface, these meshes will be able to leave steel deposits in the surface of the stainless steel, that will turn in rust points.

MANTENIMIENTO Y LIMPIEZA DEL ACERO INOXIDABLE CON RECOBRIMIENTO PVD TITANIUM

Este acabado se consigue mediante la tecnología PVD (Physical Vapor Deposition). Es un proceso no galvánico, no poluente, ampliamente utilizado en la industria de la relojería. Se parte de acero pulido brillante. O satinado y se consiguen piezas en titanio brillante o satin. Este es un acabado de calidad excepcionalmente alta, dando el producto final una duraleza adicional y una resistencia a la corrosión muy alta. Aunque bastante más resistente a la corrosión que el acero inoxidable sin PVD existen agentes responsables de la aparición de la decoloración:

- *La falta de mantenimiento*
- *La limpieza con productos químicos inadecuados, tales como ácidos o bases.*
- *La instalación en las zonas costeras de alta salinidad en el exterior, o en áreas con alta concentración de cloruro, como en piscinas.*
- *La instalación en zonas muy contaminadas como zonas industriales.*

LIMPIEZA DE RUTINA Y CUIDADOS

Para conservar el acero inoxidable, limpiar huellas dactilares, grasa y otras manchas, puede utilizar nuestro spray JNF (METAFLUX o INOX PROTECT), aplicado con un paño suave y seco.

Nota: no utilizar otros productos químicos, de su uso podrá resultar la formacion de puntos de oxido. Ejemplo: acidos o alcalinos fuertes como: HCl (ácido cloridrico); H2SO4 (ácido sulfúrico); HN03 (ácido nítrico); NaOH (hidróxidodel sodio); KOH (hidróxido de potasio) y otros.

Nota: no utilice ningúna malla abrasiva, las lanas de limpieza o los cepillos de alambre. Además de poder dañar la superfcie, estos acoplamientos podrán dejar depósitos de hierro en la superfcie del acero inoxidable, el cuál podrá convertirse en puntos de oxido.

3M INOX CLEANER:
Remove eficazmente poeira e sujidade, proporcionando uma limpeza uniforme sem deixar marcas. Possui efeito antiestático, ajudando a reduzir a deposição de partículas. Deixa as superfícies com aspeto renovado, sendo indicado para utilização em todo o tipo de superfícies em aço inoxidável.

3M INOX CLEANER:
Effectively removes dust and dirt, providing a uniform clean without leaving streaks. It has an antistatic effect, helping to reduce particle buildup. Leaves surfaces looking refreshed and is suitable for use on all types of stainless steel surfaces.

3M INOX CLEANER:
Elimina eficazmente el polvo y la suciedad, proporcionando una limpieza uniforme sin dejar marcas. Tiene efecto antiestático, lo que ayuda a reducir la acumulación de partículas. Deja las superficies con un aspecto renovado y es apto para todo tipo de superficies de acero inoxidable.

DECLARAÇÃO DE DESEMPENHO / MARCAÇÃO CE /
DECLARATION OF PERFORMANCE (DOP) /
DECLARACIÓN DE PRESTACIONES / MARCADO CE

PUXADORES DE MULETA E REDONDOS.

A JNF possui um laboratório interno onde são elaborados ensaios de resistência segundo a Norma Europeia EN 1906:2012, e em determinados modelos de puxadores são igualmente testados em laboratórios externos acreditados.

A JNF disponibiliza uma declaração de desempenho onde assume a responsabilidade legal pela conformidade do produto com o desempenho declarado. Os puxadores constantes no catálogo encontram-se classificados de acordo com a referida norma:

LEVER HANDLES AND KNOB FURNITURE.

JNF has an internal laboratory where are made resistance tests according to European Standard EN 1906:2012, and some models of handles are also tested in accredited external laboratories.

JNF provides a declaration of performance where assumes legal responsibility for conformity of the product with the declared performance. The lever handles presented in this catalog are classified accordingly to the related standard:

MANILLAS Y POMOS DE PUERTAS.

JNF tiene un laboratorio interno donde las pruebas de resistencia se hacen de acuerdo a la norma europea EN 1906:2012, y ciertos modelos de manillas también se prueban en laboratorios externos acreditados.

La JNF proporciona una declaración de prestaciones donde asume la responsabilidad legal de la conformidad del producto con las prestaciones declaradas. Las manillas mencionados en el catálogo se clasifican de acuerdo a la referida norma:

EN1906 DESCRIÇÃO

1 CATEGORIA DE USO
GRAU 1: Utilização Ligeira
Puxador para utilização em portas ou janelas de habitações e em edifícios, onde exista uma probabilidade muito baixa de ocorrência de acidentes ou de uma utilização indevida. (Situações domésticas, escritórios e áreas onde não há acesso do público geral).

GRAU 2: Utilização Média
Puxadores para utilização em portas ou janelas de habitações e em edifícios onde exista alguma probabilidade de ocorrência de acidentes ou de uma utilização indevida. (Situações domésticas, escritórios e áreas onde há um acesso limitado do público geral).

GRAU 3: Utilização Elevada
Puxadores para uso em portas de edifícios onde existe uma frequência elevada de utilização pouco cuidada e com uma grande probabilidade de ocorrência de acidentes ou de mau uso. (Edifícios públicos e institucionais, como bibliotecas, hospitais e escolas).

GRAU 4: Utilização Severa
Puxadores para utilização em portas de elevada frequência e que são objecto de utilização violenta. (Edifícios públicos e institucionais, como estádios, casas de banho públicas).

2 DURABILIDADE
GRAU 6: Frequência média de utilização: Ensaio de durabilidade 100.000 ciclos.
GRAU 7: Frequência alta de utilização: Ensaio de durabilidade 200.000 ciclos.

3 PESO DA PORTA.
Não aplicável.

4 APLICÁVEL EM PORTAS
Corta-fogo / fumo
GRAU 0: Não aplicável.
GRAU 1: Aplicável (EN 1634-1).

5 SEGURANÇA DE PESSOAS
GRAU 0: Uso normal.
GRAU 1: Impossibilidade de causar ferimentos.

6 RESISTÊNCIA À CORROSÃO
Classificação de acordo com ensaio de nevoeiro salino neutro, segundo a norma EN 1670:2007.
GRAU 0: Não definido.
GRAU 1: 24h – Resistência fraca à corrosão.
GRAU 2: 48h – Resistência moderada à corrosão.
GRAU 3: 96h – Resistência alta à corrosão.
GRAU 4: 240h – Resistência elevada à corrosão.

7 SEGURANÇA DE BENS
GRAU 0: Não aplicável em portas/sistemas de segurança.
GRAU 1: Segurança mínima contra roubo.
GRAU 2: Segurança baixa contra roubo.
GRAU 3: Segurança média contra roubo.
GRAU 4: Segurança alta contra roubo.

8 TIPO DE FUNCIONAMENTO
TIPO A: Puxador com mola compensadora.
TIPO B: Puxador com mola em carga.
TIPO U: Puxador sem mola.

EN1906 **3** 7 - 0 1 4 0 A

EXEMPLO: *Corresponde a um puxador para uma utilização elevada com mola compensadora, submetido a ensaio de durabilidade de 200 000 ciclos. Destinado a ser utilizado em portas de edifícios onde existe probabilidade de ocorrência de acidentes ou de má utilização, não aprovado para portas corta-fogo e não se encontra apto para portas de segurança. elevada resistência à corrosão.*

EN1906 DESCRIPTION

1 CATEGORY OF USE
GRADE 1: Light Use
Handles for doors or windows, houses or buildings, where there is a very low probability of the occurrence of accidents or vandalism. (Domestic situations, offices and areas where there is no general public access).

GRADE 2: Medium Use
Handles for doors or windows, houses or buildings, where there is a low probability of the occurrence of accidents or vandalism. (Domestic situations, internal offices and areas where is limited access to the general public).

GRADE 3: High Usage
Handles for doors or windows, houses or buildings, where there is a high frequency of use users with little care and a high probability of accidents or vandalism (Public and institutional buildings, as libraries, hospitals and schools).

GRADE 4: Severe Use
Handles for doors or windows, houses or buildings, high frequency of use and are subject to violent use. (Public and institutional buildings, as stadiums, public toilets).

2 DURABILITY
GRADE 6: Medium frequency of use: test durability of 100,000 cycles.
GRADE 7: High frequency of use: test durability of 200,000 cycles.

3 DOOR MASS
Not applicable.

4 FIRE RESISTANCE
Fire-proof / smoke
GRADE 0: Not applicable
GRADE 1: Applicable (EN 1634-1)

5 SAFETY
GRADE 0: Normal use
GRADE 1: Inability to cause injury

6 CORROSION RESISTENCE
Classification according to salt spray test, according to EN 1670:2007.
GRADE 0: Not defined.
GRADE 1: 24h – Low resistance to corrosion.
GRADE 2: 48h –Moderate resistance to corrosion.
GRADE 3: 96h – High resistance to corrosion.
GRADE 4: 240h – Very high resistance to corrosion.

7 SAFETY OF GOODS
GRADE 0: Not applicable in doors/safety systems.
GRADE 1: Minimal security against theft.
GRADE 2: Low security against theft.
GRADE 3: Medium security against theft.
GRADE 4: High security against theft.

8 TYPE OF OPERATION
TYPE A: handle with return spring.
TYPE B: handle with spring loaded.
TYPE U: handle without spring.

EN1906 **3** 7 - 0 1 4 0 A

EXAMPLE: *Lever handle with high usage with test durability of 200.000 cycles. No fire proof. Unable to cause injury. Very high resistance to corrosion. Not applicable in safety doors. With return spring.*

EN1906 DESCRIPCIÓN

1 CATEGORÍA DE USO
GRADO 1: Uso ligero
Manilla para puertas o ventanas de casas y edificios, donde hay una muy baja probabilidad de ocurrencia de accidentes o mal uso. (Situaciones internas, oficinas y áreas donde no hay acceso al público en general).

GRADO 2: Uso medio
Manillas para puertas o ventanas viviendas y edificios donde hay alguna probabilidad de accidentes o de uso indebido. (Situaciones internas, las oficinas y áreas donde un acceso limitado al público en general).

GRADO 3: Uso intenso
Manillas para uso en las puertas de los edificios donde hay una alta frecuencia de uso de los usuarios con poco cuidado y una alta probabilidad de accidentes o uso indebido. (Edificios públicas y institucionales, como bibliotecas, hospitales y escuelas).

GRADO 4: Uso Severo
Manillas para puertas con alta frecuencia de uso y son objeto de uso violento. (Edificios públicos y institucionales, como estadios, baños públicos).

2 - DURABILIDAD
Grado 6: frecuencia media de uso: la prueba la durabilidad de 100.000 ciclos
Grado 7: La alta frecuencia de uso: la prueba la durabilidad de 200.000 ciclos

3 - PESO DE LA PUERTA
No aplicable.

4 - RESISTENCIA AL FUEGO
Prueba de fuego / humo
Nivel 0 - No aplicable
Grado 1 - aplicable (EN 1634-1)

5 - SEGURIDAD DE LAS PERSONAS
Grado 0: Uso normal
Grado 1: Imposibilidad de causar lesiones

6 - CORROSIÓN
Clasificación según la prueba de niebla salina, de acuerdo a la norma EN 1670:2007 Nivel 0 - No definido
Grado 1 - 24h - baja resistencia a la corrosión
Grado 2 - 48h-resistencia moderada a la corrosión
Grado 3 - 96h -elevada resistencia a la corrosión
Grado 4 - 240h - alta resistencia a la corrosión

7 - SEGURIDAD DE LOS BIENES
Nivel 0 - No se aplica
Grado 1 - Mínimo de seguridad contra el robo
Grado 2 - Baja seguridad contra el robo
Grado 3 - seguridad media contra el robo
Grado 4 - Alta seguridad contra el robo

8 - TIPO DE OPERACIÓN
Tipo A - con muelle
Tipo B - con muelle en carga
Tipo U - sin muelle

EN1906 **3** 7 - 0 1 4 0 A

EJEMPLO: *Manilla con alta frecuencia de uso con una durabilidad minima de 200.000 ciclos. No aplicable en puertas corta fuego. Con seguridad contra lesiones. Alta resistencia a la corrosión. No aplicable en puertas de seguridad. Con muelle compensadora.*

A ROSETA À PROVA DO TEMPO!
FABRICADA INTEGRALMENTE EM AÇO INOX, COM ROLAMENTO DE ESFERAS PARA PORTAS COM USO EXTREMO.

Roseta completa em aço inoxidável, resistente à corrosão, com mola compensadora, reversível, blindada, com rolamento de esferas. Anti-fricção e anti-ruído, parafusos passantes M4 a 38mm. O puxador não está fixo à base, pode ser removido com ferramenta. Modelo patenteado JNF.

TIME PROOF ROSE!
MADE ENTIRELY OF STAINLESS STEEL, WITH BALL BEARINGS FOR DOORS WITH EXTREME USE.

Stainless steel complete rose, corrosion resistant, with compensating spring, reversible, armored, with ball bearings.
Anti-friction and anti-noise, M4 through screws at 38mm. The handle is not fixed to the base, it can be removed with a tool.
JNF patented model.

LA ROSETA PROBADA POR EL TIEMPO!
FABRICADA ÍNTEGRAMENTE EN ACERO INOXIDABLE, CON RODAMIENTOS DE BOLAS PARA PUERTAS CON USO EXTREMO.

Roseta completa de acero inoxidable resistente a la corrosión con muelle compensador, reversible, blindada, con rodamiento de bolas. Antifricción y antirruido, tornillos pasantes M4 a 38mm.
La manilla no está fijado a la base, se puede quitar con una herramienta.
Modelo patentado JNF.

EASY FIX

Sistema de fixação rápida para puxadores

Fast fixing system for lever handles

Sistema de fijación rápida para manillas

EASY FIX É UM SISTEMA DE FIXAÇÃO RÁPIDA DO CONJUNTO DE PUXADORES, ROSETAS OU PLACAS.

O TRADICIONAL SISTEMA DE FIXAÇÃO POR PARAFUSO ALLEN FOI ELIMINADO, SENDO SUBSTITUÍDO POR UM SISTEMA DE FIXAÇÃO AUTO AJUSTÁVEL. (EASY FIX)

COM ESTE SISTEMA, A INSTALAÇÃO DOS PUXADORES EM OBRA É REDUZIDA A +/- 7SEGUNDOS POR CONJUNTO, GARANTINDO SIMULTANEAMENTE A CARGA DE TRAÇÃO E TORÇÃO EXIGIDA PELA NORMATIVA EN.1906.

EASY FIX IS A FAST FIXING SYSTEM FOR LEVER HANDLES, ROSES AND PLATES.

THE TRADITIONAL ALLEN SCREW FASTENING SYSTEM HAS BEEN ELIMINATED AND REPLACED WITH A SELF-ADJUSTING FASTENING SYSTEM (EASY FIX).

WITH THIS SYSTEM, THE HANDLES INSTALLATION ON SITE IS REDUCED TO ABOUT 7 SECONDS PER SET, WHILE ENSURING THE TRACTION AND TORQUE LOAD REQUIRED BY EN.1906.

EASY FIX ES UN SISTEMA DE FIJACIÓN RÁPIDA PARA LO CONJUNTO DE MANILLAS, ROSETAS O PLACAS.

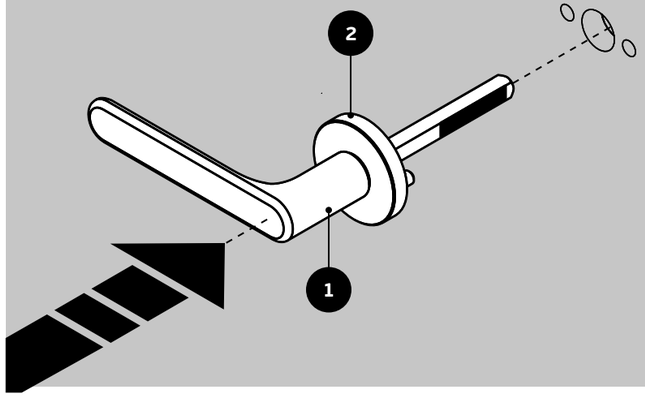

SE ELIMINÓ LO TRADICIONAL SISTEMA DE FIJACIÓN CON TORNILLOS ALLEN, SIENDO SUSTITUIDO POR UN SISTEMA DE FIJACIÓN AUTOAJUSTABLE. (EASY FIX)

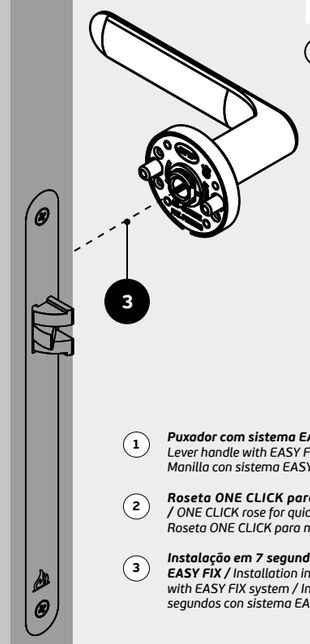

CON ESTE SISTEMA, LA INSTALACIÓN DE MANILLAS EN OBRA SE REDUCE A +/- 7 SEGUNDOS POR PARTIDO, GARANTIZANDO SIMULTÁNEAMENTE LA CARGA DE TRACCIÓN Y TORSIÓN EXIGIDA POR LA NORMA EN.1906.

EASY FIX

ART DECO COLLECTION

A JNF DESENVOLVEU UMA NOVA SÉRIE DE PUXADORES INSPIRADOS NO MOVIMENTO ART DECO, ORIGINÁRIO DA DÉCADA DE 1920, CARACTERIZADA PELO USO DE FORMAS GEOMÉTRICAS E ESTILIZADAS.

A SOFISTICAÇÃO DESTA LINHA, JUNTAMENTE COM A TECNOLOGIA DE MAQUINAÇÃO ACTUAL E O ACABAMENTO MANUAL PERMITE UMA PERFEITA INTEGRAÇÃO NA ARQUITETURA ACTUAL.

O AÇO INOXIDÁVEL COMO MATERIAL PRINCIPAL, EM CONJUNTO COM ACABAMENTOS DE TITÂNIO PVD GARANTE PEÇAS INTEMPORAIS.

JNF developed a new series of handles inspired in the Art Deco movement, originated in 1920´s, which was characterized by the use of geometric and stylized shapes.

The sophistication of this line, together with actual technology of machinery and hand crafted finish allows perfect integration in actual architecture.

The stainless steel as main material, along the PVD Titanium finishes ensures life time pieces, with a streamlined look.

JNF ha desarrollado una nueva serie de pomos inspirados en el movimiento Art Deco, originario de la década de 1920, caracterizados por el uso de formas geométricas y estilizadas.

La sofisticación de esta línea, junto con la tecnología actual de mecanizado y acabado manual, permite una perfecta integración en la arquitectura actual.

El acero inoxidable como material principal, junto con los acabados en PVD Titanio garantizan piezas atemporales.

MANILLAS Y ACCESORIOS.

BAUHAUS COLLECTION

Em 1923, Walter Gropius criou uma peça que foi a síntese da Escola da Bauhaus aplicada a um só objeto: um puxador funcional, simples e elegante.
A JNF recria-o, mantendo a matriz original, mas inovando nos materiais e na técnica.

O aço inoxidável é a matéria-prima dominante, à qual se aliam outros materiais, tais como a madeira, o acetato de celulose ou, ainda, acabamentos com titânio PVD.

A gama de combinações é vasta e prima pelo equilíbrio. O resultado é um puxador de inspiração histórica, criado segundo uma elegância da forma submetida à função.

In 1923, Walter Gropius created a piece that was the synthesis of the Bauhaus School applied to a single object: a functional, simple and elegant handle.
JNF recreates it, keeping the original matrix, but innovating in the materials and technique.

Stainless steel is the dominant raw material, to which other materials, such as wood, cellulose acetate or even titanium PVD finishes.

The range of combinations is vast and balanced. The result is a handle with a historical inspiration, created according to an elegance of form subjected to function.

En 1923, Walter Gropius creó una pieza que era la síntesis de la Escuela de la Bauhaus aplicada a un solo objeto: un tirador funcional, sencillo y elegante.
JNF lo recrea, manteniendo la matriz original, pero innovando en los materiales y en la técnica.

El acero inoxidable es la materia prima dominante, a la que se suman otras materiales, como la madera, el acetato de celulosa o incluso los acabados de PVD de titanio. con PVD de titanio.

La gama de combinaciones es amplia y equilibrada. El resultado es una manilla de inspiración histórica, creada según una elegancia de la forma sometida a la función.

ARCHI SKECTH
BY *CHRISTIAN MAGALHÃES*

Desenhado por Christian Magalhães, esta colecção foi inspirada pela arquitetura contemporânea e pelos desenhos bidimensionais, marcados também pelas influências de superfícies em cimento.

Designed by Christian Magalhães, this collection was inspired by the contemporary architcture and bidimensional sketches, marked also by the influences of concrete surfaces.

Diseñada por Christian Magalhães, esta colección se inspiró en la arquitectura contemporánea y los dibujos bidimensionales, también marcados por las influencias de las superficies de cemento.

DESIGNED BY: CHRISTIAN MAGALHÃES	ARCHI SKETCH SERIES / IN.00.131
INDUSTRIAL DESIGNER	CREATED: 2021
COUNTRY: PORTUGAL	SCALE 1:1
JNF - ARCHITECTURAL HARDWARE	MATERIAL: STAINLESS STEEL (EN 1. 4301/AISI 304)

BORN AS URBAN ART

ARCHI SKETCH É INSPIRADO PELA ARQUITETURA CONTEMPORÂNEA E PELOS DESENHOS BIDIMENSIONAIS, MARCADOS TAMBÉM PELAS INFLUÊNCIAS DE SUPERFÍCIES EM CIMENTO.

A MISTURA DE DIFERENTES PLANOS CRIA FORMAS GEOMÉTRICAS QUE, QUANDO COMBINADAS, O PUXADOR FICA MOLDADO AO VISUAL E TORNA-SE CONFORTÁVEL AO TOQUE.

ARCHI SKETCH IS INSPIRED BY THE CONTEMPORARY ARCHITECTURE AND BIDIMENSIONAL SKETCHES, MARKED ALSO BY THE INFLUENCES OF CONCRETE SURFACES.

THE MIX OF DIFFERENT PLANS CREATES GEOMETRIC FORMS, COMBINED BETWEEN ALL OF THEM IN SUCH A WAY, THAT THE HANDLE IS SHARPEN TO THE LOOK AND COMFORTABLE TO THE TOUCH.

ARCHI SKETCH ESTÁ INSPIRADO EN LA ARQUITECTURA CONTEMPORÁNEA Y LOS DIBUJOS BIDIMENSIONALES, TAMBIÉN MARCADOS POR LAS INFLUENCIAS DE LAS SUPERFICIES DE CEMENTO.

A MEZCLA DE DIFERENTES PLANOS CREA FORMAS GEOMÉTRICAS, COMBINADAS ENTRE TODAS ELLAS DE TAL MANERA QUE EL MANGO SE AMOLDA A LA MIRADA Y CÓMODO AL TACTO.

ORGANIC ESSENTIALS

BY ROSS LOVEGROVE

GERMAN DESIGN AWARD WINNER 2025

DESIGN AWARD 2025

ORGANIC ESSENTIALS

PUXADORES E ACESSÓRIOS /
LEVER HANDLES AND ACCESSORIES /
MANILLAS Y ACCESORIOS.

Ross Lovegrove situa-se na intersecção entre a natureza, a arte e a tecnologia, remodelando o panorama do design industrial.

O seu trabalho transcende as fronteiras tradicionais, fundindo o orgânico com o artificial, o estético com o funcional, de uma forma que ecoa a beleza fluida e intrincada das formas naturais.

A abordagem de Lovegrove desafia a rigidez da produção em massa, defendendo uma filosofia onde o design não se limita à utilidade, mas procura incorporar a própria vida.

Inspirado pelo biomorfismo e pelo essencialismo orgânico, as suas criações extraem-se diretamente dos projetos da natureza, encontrando elegância em curvas, estruturas celulares e formas fluidas que remetem à conexão primordial entre forma e ambiente.

Com materiais de ponta e tecnologias de impressão 3D, Lovegrove esculpe objetos que são tanto obras de arte como produtos industriais, com o objetivo de inspirar e enriquecer a experiência humana.

Ross Lovegrove stands at the intersection of nature, art, and technology, reshaping the landscape of industrial design.

His work transcends traditional boundaries, blending the organic with the engineered, the aesthetic with the functional, in a manner that echoes the fluid, intricate beauty of natural forms.

Lovegrove's approach challenges the rigidity of mass production, championing an ethos where design isn't merely about utility but about embodying life itself.

Inspired by biomorphism and organic essentialism, his creations draw directly from nature's own blueprints, finding elegance in curves, cellular structures, and flowing shapes that speak to the primal connection between form and environment.

With cutting-edge materials and 3D printing technologies, Lovegrove sculpts objects that are as much works of art as they are industrial products, aiming to inspire and enrich the human experience.

Ross Lovegrove se sitúa en la intersección de la naturaleza, el arte y la tecnología, transformando el panorama del diseño industrial.

Su obra trasciende las fronteras tradicionales, fusionando lo orgánico con lo ingenieril, lo estético con lo funcional, de una manera que evoca la belleza fluida y compleja de las formas naturales.

El enfoque de Lovegrove desafía la rigidez de la producción en masa, defendiendo una ética donde el diseño no se limita a la utilidad, sino que encarna la vida misma.

Inspirado por el biomorfismo y el esencialismo orgánico, sus creaciones se nutren directamente de los planos de la naturaleza, encontrando elegancia en curvas, estructuras celulares y formas fluidas que conectan con el vínculo primordial entre la forma y el entorno.

Con materiales de vanguardia y tecnologías de impresión 3D, Lovegrove esculpe objetos que son tanto obras de arte como productos industriales, con el objetivo de inspirar y enriquecer la experiencia humana.

DESIGN INSPIRADO NA NATUREZA
PRINCÍPIOS DA BIOMIMÉTICA

A coleção LOVEGROVE x JNF está profundamente enraizada nos princípios da biomimética.

Ao imitar as formas e os sistemas mais eficientes da natureza, cada design não só tem um aspeto orgânico, como também funciona em harmonia com o ambiente.

Esta abordagem permite-nos criar peças que não são apenas esteticamente impressionantes, mas também concebidas para um desempenho ideal.

TECNOLOGIA HÍBRIDA 3D JNF

Trata-se de um processo altamente complexo que incorpora técnicas adicionais de maquinação CNC, essenciais para peças com uma rigorosa precisão técnica e dimensional. Está associado à tecnologia de soldadura a laser.

O acabamento é feito roboticamente para as formas mais orgânicas e complexas das peças. Por fim, o brilho é obtido com um acabamento manual.

O tratamento de superfície envolve o revestimento de titânio utilizando a tecnologia PVD.

NATURE INSPIRED DESIGN
BIOMIMICRY PRINCIPLES

The LOVEGROVE x JNF collection is deeply rooted in the principles of biomimicry.

By mimicking nature's most efficient forms and systems, each design not only looks organic but functions in harmony with the environment.

This approach allows us to create hardware that is not only aesthetically striking but also engineered for optimal performance.

JNF HYBRID 3D TECHNOLOGY

It is a highly complex process that incorporates additional CNC machining techniques, essential for parts with strict technical and dimensional precision.

It is associated with laser welding technology. The finishing is robotic for the most organic and complex shapes of the parts. Finally, the shine is achieved with a manual finish.

The surface treatment involves titanium coating using PVD technology.

DISEÑO INSPIRADO EN LA NATURALEZA
PRINCIPIOS DE BIOMÍMETRO

La colección LOVEGROVE x JNF se basa en los principios del biomímesis.

Al imitar las formas y sistemas más eficientes de la naturaleza, cada diseño no solo luce orgánico, sino que también funciona en armonía con el entorno.

Este enfoque nos permite crear hardware que no solo es estéticamente atractivo, sino que también está diseñado para un rendimiento óptimo

TECNOLOGÍA 3D HÍBRIDA JNF

Se trata de un proceso altamente complejo que incorpora técnicas adicionales de mecanizado CNC, esenciales para piezas con estricta precisión técnica y dimensional.

Se combina con la tecnología de soldadura láser. El acabado es robótico para las formas más orgánicas y complejas de las piezas. Finalmente, el brillo se logra mediante un acabado manual.

El tratamiento superficial incluye un recubrimiento de titanio mediante tecnología PVD.

Lovegrove

Este design captura as complexas possibilidades da manufatura aditiva, integrando-as numa linguagem arquitetónica refinada.

Oferece uma experiência tátil única, distinta de qualquer outro puxador, mantendo ao mesmo tempo uma estética disciplinada que agrada tanto a projetos arquitetónicos de grande como de pequena dimensão.

O puxaodor incorpora uma fusão elegante de profundidade cultural e precisão material, tornando-se um complemento intemporal para espaços onde o significado duradouro e o design criterioso são fundamentais.

This design captures the intricate possibilities of additive manufacturing, weaving them into a refined architectural language.

It ofers a unique tactile experience, distinct from any other door handle, while maintaining a disciplined aesthetic that appeals to both large and small architectural projects.

The handle embodies an elegant fusion of cultural depth and material precision, making it a timeless addition to spaces where long-term significance and thoughtful design are paramount.

Este diseño captura las complejas posibilidades de la fabricación aditiva, integrándolas en un refinado lenguaje arquitectónico.

Ofrece una experiencia táctil única, distinta a la de cualquier otra manija, manteniendo una estética sobria que resulta atractiva tanto para proyectos arquitectónicos de gran como de pequeña escala.

La manilla encarna una elegante fusión de profundidad cultural y precisión material, convirtiéndose en un elemento atemporal para espacios donde la relevancia a largo plazo y el diseño cuidado son primordiales.

Inspirado na eficiência esquelética da evolução das aves, este projeto procura uma leveza extraordinária.

Baseando-se na engenharia natural das estruturas ósseas das aves, reinterpreta o uso mínimo de materiais numa forma metálica impressa em 3D na perfeição.

O resultado é uma obra-prima com uma topologia otimizada, desmaterializada, mas estruturalmente resiliente.

Este projeto exemplifica o futuro dos elementos arquitetónicos leves e de alto desempenho, unindo a tecnologia de ponta com os designs mais eficientes da natureza.

Inspired by the skeletal efficiency of avian evolution, this design seeks an extraordinary lightness.

Drawing from the natural engineering of bird bone structures, it reinterprets minimal material use into a seamlessly 3D-printed metal form.

The result is a topology-optimised masterpiece dematerialised yet structurally resilient.

This design exemplifies the future of lightweight, high-performance architectural elements, merging cuting-edge technology with nature's most efficient designs.

Inspirado en la eficiencia esquelética de la evolución aviar, este diseño busca una ligereza extraordinaria.

Partiendo de la ingeniería natural de las estructuras óseas de las aves, reinterpreta el uso mínimo de materiales en una forma metálica impresa en 3D sin fisuras.

El resultado es una obra maestra de topología optimizada, desmaterializada pero estructuralmente resistente.

Este diseño ejemplifica el futuro de los elementos arquitectónicos ligeros y de alto rendimiento, fusionando tecnología de vanguardia con los diseños más eficientes de la naturaleza.

Inspirada na elegância orgânica do crescimento dos corais, este puxador exala uma presença luxuosa, enraizada na beleza da natureza.

A essência luxuosa do design, derivada da palavra latina Luxus (que significa florescer), evoca a sensação de algo que brota naturalmente da porta.

O seu formato é generoso ao toque e reflete a luz como uma joia finamente trabalhada.

Esta peça complementa a tendência emergente de artesanato requintado em espaços sofisticados, onde a beleza e a funcionalidade se encontram em perfeita harmonia.

Inspired by the organic elegance of coral growth, this handle exudes a luxurious presence grounded in nature's beauty.

The design's luxurious essence, derived from the Latin word Luxus (meaning blossoming), evokes the feeling of something growing naturally from the door.

Its form is generous to the touch and reflects light like a finely crafted jewel.

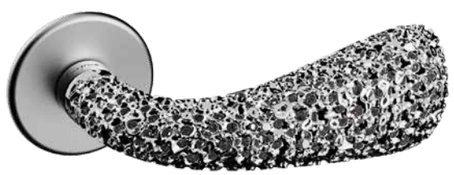

This piece complements the emerging trend of refined craftsmanship in high-end spaces, where beauty and functionality meet in perfect harmony.

Inspirada en la elegancia orgánica del crecimiento del coral, esta manilla irradia una presencia lujosa arraigada en la belleza de la naturaleza.

La esencia lujosa de su diseño, derivada de la palabra latina Luxus (que significa florecimiento), evoca la sensación de algo que brota naturalmente de la puerta.

Su forma es agradable al tacto y refleja la luz como una joya finamente elaborada.

Esta pieza complementa la creciente tendencia de la artesanía refinada en espacios de alta gama, donde la belleza y la funcionalidad se unen en perfecta armonía.

SLIM SQUARE
BY *PEDRO QUEIRÓS*

Desenhado por Pedro Queirós, esta colecção foi inspirada na simplicidade das formas geométricas.

As formas geométricas têm o poder de criar designs inspiradores que podem de alguma forma transformar o espaço em que estão inseridas.

Designed by Pedro Queirós, this collection was inspired by the simplicity of geometric shapes.

Geometric shapes have the power to create inspiring designs that can somehow transform the space in which they are inserted.

Diseñada por Pedro Queirós, esta colección se inspiró en la sencillez de las formas geométricas.

Las formas geométricas tienen el poder de crear diseños inspiradores que de alguna manera pueden transformar el espacio en el que se insertan.

WOOD NATURE

A COLEÇÃO WOOD NATURE FOI DESENVOLVIDA PARA TER O MÍNIMO IMPACTO AMBIENTAL POSSÍVEL, UTILIZANDO MATERIAIS RECICLADOS E MADEIRAS COM CERTIFICAÇÃO FSC, OU SEJA, COM MATERIAIS PROVENIENTES DE FLORESTAS GERIDAS DE FORMA RESPONSÁVEL E/OU DE FONTES RECICLADAS.

A CAUSA AMBIENTAL É ALGO QUE A JNF TEM COMO PRIORIDADE, E ESTE PROJETO É UM EXEMPLO, DESDE O AÇO INOXIDÁVEL UTILIZADO QUE É RECICLADO ATÉ ÀS EMBALAGENS EM CARTÃO COM CERTIFICAÇÃO FSC, SEM USO DE QUALQUER PLÁSTICO.

A INSPIRAÇÃO VEM DOS GALHOS DAS ÁRVORES PROPORCIONANDO FORMAS ORGÂNICAS E ERGONÔMICAS.

EXISTEM 4 ACABAMENTOS DE MADEIRA NATURAL DISPONÍVEIS, CARVALHO, BAMBU, BÉTULA E BLACKWOOD. O ACABAMENTO TAMBÉM É ECOLOGICAMENTE SUSTENTÁVEL, UTILIZANDO VERNIZ PARA MADEIRA À BASE DE ÁGUA.

COMO OPCIONAL, NO AÇO INOXIDÁVEL PODEMOS TAMBÉM FORNECER ACABAMENTOS COM COR, ATRAVÉS DO PROCESSO PVD TITANIUM, O PRETO, DOURADO, COBRE E CHOCOLATE PODEM SER CRIADOS COM ESTE PROCESSO IGUALMENTE SEM IMPACTO AMBIENTAL, SENDO O PVD UM PROCESSO FÍSICO.

WOOD NATURE COLLECTION WAS DEVELOPED TO HAVE THE MINIMUM ENVIRONMENTAL IMPACT POSSIBLE, USING RECYCLED MATERIALS AND WOODS WITH FSC CERTIFICATION, IT MEANS IT IS MADE WITH MATERIALS FROM RESPONSIBLY MANAGED FORESTS AND/OR RECYCLED SOURCES.

JNF IS TAKING VERY SERIOUSLY THE ENVIRONMENTAL CAUSE, AND THIS PROJECT IS ONE EXAMPLE, FROM THE STAINLESS STEEL USED THAT IS RECYCLED TO THE PACKAGING WITHOUT PLASTICS AND CARTON WITH FSC CERTIFICATION.

THE INSPIRATION COMES FROM THE BRANCHES OF THE TREES PROVIDING ORGANIC AND ERGONOMIC SHAPES.

THERE ARE 4 AVAILABLE NATURAL WOOD FINISHES, OAK, BAMBOO, BIRCH & BLACKWOOD. THE FINISH IS ALSO ECO FRIENDLY CREATED BY NATURAL WATER BASED WOOD VARNISH.

AS OPTIONAL, IN THE STAINLESS STEEL WE ALSO CAN PROVIDE COLOUR FINISH, MADE BY PVD TITANIUM, BLACK, GOLD, COOPER AND CHOCOLATE COLOURS CAN BE ACHIEVED WITH THIS PROCESS ALSO WITHOUT ANY ENVIRONMENT IMPACT, AS THE PVD IS A PHYSICAL PROCESS WITHOUT ANY CHEMICAL PROCESS INVOLVED.

LA COLECCIÓN WOOD NATURE FUE DESARROLLADA PARA TENER EL MENOR IMPACTO AMBIENTAL POSIBLE, UTILIZANDO MATERIALES RECICLADOS Y MADERA CERTIFICADA FSC, ES DECIR, CON MATERIALES PROVENIENTES DE BOSQUES MANEJADOS RESPONSABLEMENTE Y/O FUENTES RECICLADAS.

LA CAUSA AMBIENTAL ES ALGO QUE JNF TIENE COMO PRIORIDAD, Y ESTE PROYECTO ES UN EJEMPLO, DESDE EL USO DE ACERO INOXIDABLE QUE SE RECICLA HASTA LOS EMPAQUES DE CARTÓN CERTIFICADOS FSC, SIN EL USO DE NINGÚN TIPO DE PLÁSTICO.

LA INSPIRACIÓN VIENE DE LAS RAMAS DE LOS ÁRBOLES APORTANDO FORMAS ORGÁNICAS Y ERGONÓMICAS.

HAY 4 ACABADOS DE MADERA NATURAL DISPONIBLES, ROBLE, BAMBÚ, ABEDUL Y BLACKWOOD. EL ACABADO TAMBIÉN ES ECOLÓGICAMENTE SOSTENIBLE, UTILIZANDO BARNIZ PARA MADERA AL AGUA.

COMO OPCIÓN, EN ACERO INOXIDABLE TAMBIÉN PODEMOS OFRECER ACABADOS EN COLOR, MEDIANTE EL PROCESO PVD TITANIUM, SE PUEDEN CREAR CON ESTE PROCESO NEGRO, DORADO, COBRE Y CHOCOLATE IGUALMENTE SIN IMPACTO AMBIENTAL, SIENDO EL PVD UN PROCESO FÍSICO.

PUXADORES E ACESSÓRIOS /
LEVER HANDLES AND ACCESSORIES /
MANILLAS Y ACCESORIOS.

ESTE SISTEMA PERMITE UMA LIGAÇÃO ENTRE O PUXADOR E A DECORAÇÃO DA PORTA: AÇO, BORRACHA, MADEIRA, VIDRO, PEDRA, PORCELANA, COBRE, LATÃO, SEM LIMITE PARA A SUA IMAGINAÇÃO...
ESTA LIGAÇÃO (LINK) É A MAIS VERSÁTIL E IMAGINATIVA ENTRE A DECORAÇÃO E OS PUXADORES DA PORTA.

THIS SYSTEM ALLOW YOU TO MAKE ANY LINK BETWEEN THE DOOR HANDLE AND YOUR DECORATION: STEEL, RUBBER, WOOD, GLASS, STONE, CERAMIC, COPPER, BRASS, WITHOUT LIMITS TO YOUR IMAGINATION...
THIS IS ONE OF THE MOST VERSATILE AND IMAGINATIVE LINK BETWEEN YOUR DECORATION AND THE HANDLES.

ESTE SISTEMA PERMITE UNA CONEXIÓN ENTRE LA MANILLA DE LA PUERTA Y SU DECORACIÓN: ACERO, CAUCHO, MADERA, CRISTAL, PIEDRA, PORCELANA, COBRE, LATÓN, SIN LIMITES PARA SU IMAGINACIÓN...
ESTA CONECIÓN (LINK) ES LA MÁS VERSÁTIL Y IMAGINATIVA ENTRE SU DECORACIÓN Y LAS MANILLAS.

Link Optic inspiram-se nos óculos de acetato de celulose, explorando os padrões de tartaruga, para uma abordagem arrojada ao cruzamento da moda com o design de interiores. Os dois modelos disponíveis trazem um acabamento surpreendente que brincam com a luz e destacam as suas cores, permitindo contrastes decorativos que fazem de um puxador uma peça de destaque e ele próprio uma fonte de inspiração.

Link Optic draws inspiration from cellulose acetate eyewear, exploring turtle patterns for a bold approach to the intersection of fashion and interior design.
The two models available have a surprising finish that plays with light and highlights colors, allowing decorative contrasts.
A simple lever handle is capable of standing out as a singular piece and a source of inspiration.

Link Optic se inspira en las gafas de acetato de celulose, explorando los patrones de las tortugas para un enfoque audaz en la intersección de la moda y el diseño de interiores.
Los dos modelos disponibles tienen un sorprendente acabado que juega con la luz y resalta los colores, permitiendo contrastes decorativos. Una sencilla manilla es capaz de destacar como pieza singular y fuente de inspiración.

MANILLAS Y ACCESORIOS.

O BETÃO É CONSIDERADO UM DOS MATERIAIS NOBRES DA CONSTRUÇÃO E ARQUITETURA CONTEMPORÂNEA. PELA SUA RELEVÂNCIA NO NOSSO QUOTIDIANO, CONSTRUÇÃO E ARQUITETURA, A JNF APRESENTA UM PUXADOR QUE COMBINA O AÇO INOXIDÁVEL COM O BETÃO, DENTRO DA SÉRIE LINK SYSTEM.

CONCRETE IS CONSIDERED ONE OF THE NOBLE MATERIALS OF CONTEMPORARY CONSTRUCTION AND ARCHITECTURE. DUE TO ITS RELEVANCE IN OUR DAILY LIVES, CONSTRUCTION, AND ARCHITECTURE, JNF PRESENTS A HANDLE THAT COMBINES STAINLESS STEEL WITH CONCRETE, WITHIN THE LINK SYSTEM SERIES.

EL HORMIGÓN SE CONSIDERA UNO DE LOS MATERIALES NOBLES DE LA CONSTRUCCIÓN Y LA ARQUITECTURA CONTEMPORÁNEAS. POR SU RELEVANCIA EN NUESTRO DÍA A DÍA, CONSTRUCCIÓN Y ARQUITECTURA, JNF PRESENTA UN TIRADOR QUE COMBINA ACERO INOXIDABLE CON HORMIGÓN, DENTRO DE LA SERIE LINK SYSTEM.

DRIVE

PUXADORES E ACESSÓRIOS /
LEVER HANDLES AND ACCESSORIES /
MANILLAS Y ACCESORIOS.

O DRIVE DISTINGUE-SE PELA SUA FORMA E PELO SEU TOQUE AGRADÁVEL, ONDE A PELE NATURAL SE ALIA A UMA COSTURA DE ASPECTO CUIDADO.

THE DRIVE HANDLE IS UNIQUE BY ITS SHAPE AND SOFT TOUCH, WHERE THE NATURAL LEATHER ALLIED TO AN HANDMADE STITCH, GIVES A CAREFUL LOOK.

LA MANILLA DRIVE SE DISTINGUE POR SU BUENA FORMA Y SU TOQUE SUAVE DONDE LA PIEL NATURAL ALIADA A UNA COSTURA HECHA A MANO LE DA UN VISTAZO CUIDADO.

SCALE 1:1

SKIN
BY *SUSANA RIBEIRO*

Desenhado por Susana Ribeiro, o toque, cúmplice do próprio material, a pele, traduz todo um conforto em ambientes comuns.

Skin, é uma linha de puxadores que foi elaborada a pensar na nova arquitectura, sendo versátil, nobre, adaptando-se a todos os espaços.

Designed by Susana Ribeiro, the touch, an accomplice of the material itself, the leather, translates all the comfort in common environments.

Skin, is a line of handles that was designed with the new architecture in mind, being versatile, noble, adapting to all spaces.

Diseñado por Susana Ribeiro, el tacto, cómplice del propio material, la piel, traduce todo el confort en ambientes comunes.

Skin, es una línea de manillas que fue diseñada pensando en la nueva arquitectura, siendo versátil, noble, adaptándose a todos los espacios.

OUTLINE

by *Christian Magalhães*

Este puxador possui uma forma discreta, mas com carácter próprio e um corpo consistente. Conjuga a leveza do alumínio à resistência do aço inoxidável. OUTLINE, destaca-se pelo seu contorno suave, contudo presente, onde o aspecto frio do aço inoxidável veste um acabamento anodizado, "Dark Grey" do alumínio.

This handle has a simple shape, but with its own character and a consistent body. Combining the lightness of aluminum and the resistance of stainless steel. OUTLINE, stands out for its smooth contour, but present. Where the cold appearance of the stainless steel wears a aluminum "Dark Grey" anodized finish.

La manilla tiene una forma sencilla, pero con un carácter propio y un cuerpo consistente. Combina la ligereza del aluminio y la resistencia del acero inoxidable. OUTLINE, destaca por su contorno suave, pero presente. Donde el aspecto frío del acero inoxidable lleva un acabado anodizado "Dark Grey" de aluminio.

SIMPLE
BY *LYDIA KÜMEL*

Desenhado por Lydia Kümel nos anos noventa, teve como inspiração os puxadores usados nas carruagens dos comboios belgas.

Coleção retomada na JNF, com mais soluções para mobiliário e banho.

Designed by Lydia Kümel in the 1990's, it was inspired by the handles used on Belgian train carriages.

Collection resumed by JNF, with more solutions for furniture and bath.

Diseñado por Lydia Kümel en la década de 1990, se inspiró en las manijas utilizadas en los vagones de tren belgas.

Colección reanudada en JNF, con más soluciones para muebles y baño.

DESIGNED BY: LYDIA KUMEL	SIMPLE SERIES / IN.00.145
ARCHITECT	CREATED: 90'S
COUNTRY: BRUSSELS	SCALE 1:1
LKDM- ARCHITECTES D'INTÉRIEUR & DESIGNERS	MATERIAL: STAINLESS STEEL (EN 1. 4301/AISI 304)

TOKYO
COLLECTION

A coleção reflete a elegância minimalista e a geometria ousada da cidade, onde as fachadas de vidro se encontram com as estruturas históricas combinando na perfeição a modernidade com a graciosidade intemporal.

Estes puxadores oferecem uma experiência tátil e estética que combina funcionalidade com design sofisticado

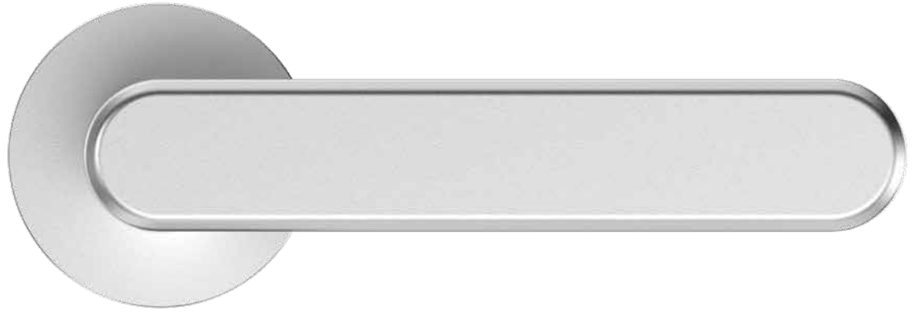

The collection reflects the minimalist elegance and bold geometry of the city, where glass facades meet historical structures, seamlessly blending modernity with timeless grace.

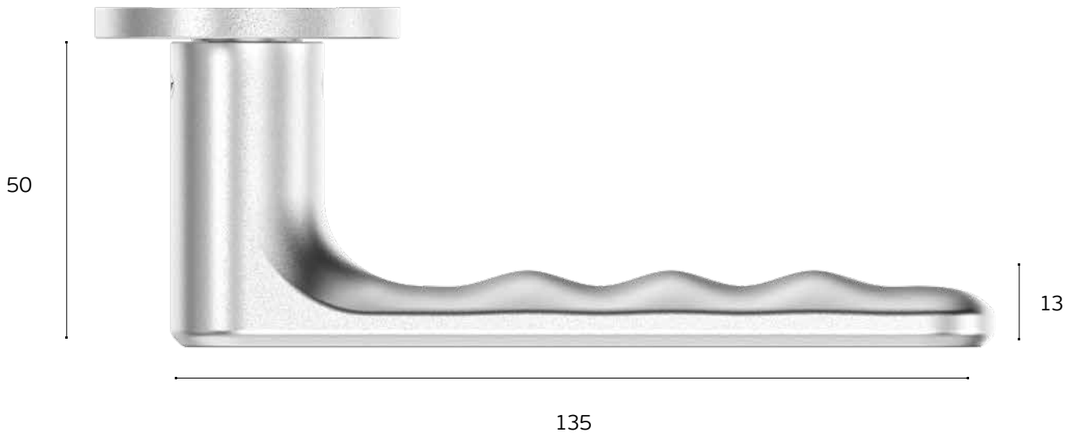

These handles offer a tactile and aesthetic experience that merges functionality with sophisticated design.

La colección refleja la elegancia minimalista y la geometría audaz de la ciudad, donde las fachadas de cristal se encuentran con las estructuras históricas, combinando a la perfección la modernidad con la gracia atemporal.

Estas manillas ofrecen una experiencia táctil y estética que combina funcionalidad con un diseño sofisticado.

GREAT TOKYO
COLLECTION

Inspirado na elegância do nosso modelo TOKYO, o GREAT TOKYO oferece um design maior e mais robusto, sendo a escolha perfeita para áreas de grande movimento e espaços públicos.

Experimente a elegância da nossa mais recente inovação: Acabamento GRAIN em aço inoxidável. Esta técnica de ponta cria uma textura suave e de grão fino que oferece um aspeto moderno e sofisticado, mantendo a durabilidade e a resistência.

Inspired by the elegance of our TOKYO model, the GREAT TOKYO offers a larger, more robust design, making it the perfect choice for high-traffic areas and public spaces.

Experience the elegance of our latest innovation Grain Finish on stainless steel. This cutting-edge technique creates a smooth, fine-grain texture that offers a modern, sophisticated look while maintaining durability and resistance.

Inspirado en la elegancia de nuestro modelo TOKYO, el GREAT TOKYO ofrece un diseño más grande y robusto, lo que lo convierte en la opción perfecta para áreas de alto tráfico y espacios públicos.

Experimente la elegancia de nuestra última innovación: el acabado GRAIN en acero inoxidable. Esta técnica de vanguardia crea una textura suave y de grano fino que ofrece un aspecto moderno y sofisticado al tiempo que mantiene la durabilidad y la resistencia.

2.000.000 CYCLES *****

BALL BEARING · 8 mm · FIRE PROOF · with spring

PUXADOR MAÇIÇO COM ROLAMENTO PARA USO INTENSIVO

1. Fabricado em barra maciça;
2. Curva perfeita (possível por ser feito numa peça única e sólida);
3. Base do puxador garante grande resistência;
4. Roseta em aço inoxidável;
5. Roseta com rolamento de esferas, confere uma resistência ao desgaste praticamente ilimitado. Aconselhado para locais de elevadíssimo tráfego de pessoas;
6. Roseta com mola compensadora 2.000.000 ciclos;
7. Mola em pré-carga, garante a posição horizontal do puxador de porta;
8. Pinos para parafusos passantes;

SOLID HANDLE WITH NEEDLE BEARING FOR INTENSIVE USE

1. Made of solid bar;
2. Perfect curve (possible because it is made in one solid piece);
3. Handle base provides strong resistance;
4. Rose made in stainless steel ;
5. Rose with ball bearing, creates resistance to wear almost unlimited. Recommended to highest traffic people local;
6. Rose with heavy duty spring 2.000.000 cycles;
7. Preloaded spring, ensures the horizontal position of the handle;
8. Pins for through bolts;

MANILLA DE PUERTA SÓLIDA CON RODAMIENTOS PARA USO INTENSIVO

1. Hecho de barra sólida;
2. Curva perfecta (posible porque está hecha de una sola pieza sólida);
3. Base de la manilla proporciona una fuerte resistencia;
4. Roseta en acero inoxidable;
5. Roseta con rodamientos de bolas, permite una resistencia al desgaste prácticamente ilimitada. Recomendado para locales de alto tráfico de personas;
6. Roseta con muelle extra fuerte 2.000.000 ciclos;
7. Muelle en pre carga, garantiza la posicion horizontal de la manilla de puerta;
8. Pitones para tornillos pasantes;

TIMES BRONZE MATERIAL

PUXADORES E ACESSÓRIOS /
LEVER HANDLES AND ACCESSORIES /
MANILLAS Y ACCESORIOS.

O BRONZE É UMA DAS LIGAS METÁLICAS MAIS NOBRES UTILIZADA PELO HOMEM DESDE O PERÍODO PRÉ-HISTÓRICO.
AS PEÇAS RESULTANTES TÊM UM CARISMA VERDADEIRAMENTE SURPREENDENTE DANDO UMA SENSAÇÃO DE INTEMPORALIDADE ABSOLUTA. AS VÁRIAS NUANCES DE CÔR DO BRONZE AO LONGO DO SEU PROCESSO DE ENVELHECIMENTO SÃO POR SI MESMO CATIVANTES, DESDE A COLORAÇÃO DO COBRE ATÉ AO VERDE QUE CONHECEMOS DAS ESTÁTUAS.OUTRA CARACTERÍSTICA MUITO IMPORTANTE DO BRONZE É A SUA ACTIVIDADE ANTI-BACTERIANA E ANTI-VIRAL. NÃO EXISTE CRESCIMENTO BACTERIOLÓGICO NAS SUPERFÍCIES DO BRONZE OU DO COBRE. EM MUITAS ESTIRPES O BRONZE OU O COBRE SÃO BACTERICIDAS.

Bronze is an noble metal alloy used by man since prehistoric times. The reached pieces have a truly amazing charisma giving a feeling of absolute timelessness. The various shades of bronze color throughout their aging process itself is captivating, from the color of copper to green statues that we know. Another very important feature of the bronze is its antibacterial and anti viral activity. There is no bacterial growth on bronze and Copper' surfaces. In many bacteria specimens the Copper or bronze are bactericidal.

El bronce es una aleación de metal noble utilizado por el hombre desde tiempos prehistóricos. Las piezas resultantes tienen un carisma verdaderamente sorprendente, dando una sensación de intemporalidad absoluta. Los distintos tonos de color bronce a lo largo de su proceso de envejecimiento en sí mismo es fascinante, desde el color del cobre a los colores verdes de las estatuas verdes que conocemos. Otra caracteristica importante del bronze es su actividad anti-bacteriana y anti-viral. No hay crescimiento bacteriológico en la superficie del bronze o del cobre. En muchas espécies el bronze y el cobre son bactericidas.

7" ONE CLICK

A roseta técnica para profissionais

A JNF DESENVOLVEU A NOVA ROSETA ONE CLICK COM O SISTEMA DE INSTALAÇÃO MAIS RÁPIDA DO MERCADO, A LIGAÇÃO PERFEITA COM OS PUXADORES E COM SISTEMA EASY FIX DA JNF.

Roseta com base metálica fundida de liga de zinco, resistente à corrosão, com mola compensadora, reversível, blindada, anti-fricção, anti-ruído, parafusos passantes M4 a 38mm. O puxador não está fixo à base, pode ser removido com ferramenta JNF.
Modelo JNF patenteado /

The technical rose for professionals

JNF HAS DEVELOPED THE NEW ONE CLICK ROSE WITH THE EASIEST AND FASTEST INSTALLATION SYSTEM ON THE MARKET, THE PERFECT CONNECTIONS WITH EASY FIX HANDLES FROM JNF.

Rose with metallic base made in zinc alloy, corrosion resistant, with compensating spring, reversible, armored, anti-friction and anti-noise, M4 through screws to 38mm. The handle is not fixed to the base, it can be removed with a tool.
JNF patented model.

La roseta técnica para profesionales

JNF HA DESARROLLADO LA NUEVA ROSETA ONE CLICK CON LO SISTEMA DE INSTALACIÓN MÁS RÁPIDO DEL MERCADO, LA CONEXIÓN PERFECTA CON LAS MANILLAS DEL SISTEMA EASY FIX DE JNF.

Roseta con base metálica, en aleación de zinco, resistente a la corrosión, con muelle de compensación, reversible, blindado, antifricción, antirruido, tornillos pasantes M4 a 38 mm.
La manilla no está fija a la base, se puede quitar con una herramienta.
Modelo patentado JNF.

Um acessório essencial para utilização com fechaduras de embutir, os fechos de casa de banho combinam privacidade, segurança e proteção com um design ergonómico.

Desenvolvidos para permitir que a porta seja fechada a partir do interior, garantem privacidade e oferecem a possibilidade de abrir a porta a partir do exterior em caso de emergência.

O design ergonómico dos botões garante uma operação sem esforço, proporcionando facilidade de utilização e conforto, mesmo em espaços apertados.

Perfeito para casas de banho, vestiários e outras áreas onde a privacidade é essencial, mas a segurança continua a ser uma prioridade.

Privacidade quando precisa. Segurança quando é importante. Ergonomia na ponta dos dedos.

An essential accessory to use with mortise locks, bathroom snib indicators that combines privacy, security and safety with ergonomic design.

Designed to allow the door to be locked from the inside, they ensure privacy while offering the ability to open the door from the outside in case of an emergency.

The ergonomic design of the buttons ensures effortless operation, providing ease of use and comfort, even in tight spaces.

Perfect for bathrooms, changing rooms, and other areas where privacy is essential but safety remains a top priority.

Privacy when you need it. Safety when it matters. Ergonomics at your fingertips.

Un accesorio esencial para usar con cerraduras de embutir, las cerraduras de baño combinan privacidad, seguridad y protección con un diseño ergonómico.

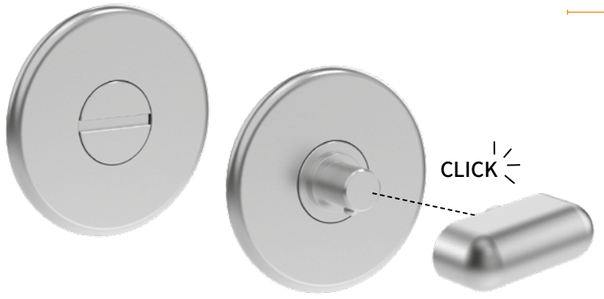

Diseñadas para permitir el cierre de la puerta desde el interior, garantizan la privacidad y ofrecen la posibilidad de abrir la puerta desde el exterior en caso de emergencia.

El diseño ergonómico del botón garantiza un funcionamiento sin esfuerzo, proporcionando facilidad de uso y comodidad incluso en espacios reducidos.

Perfecto para baños, vestuarios y otras áreas donde la privacidad es esencial pero la seguridad sigue siendo una prioridad.

Privacidad cuando la necesitas. Seguridad cuando importa. Ergonomía a tu alcance.
